

S. ANTONY MITTUL

AI & DATA SCIENCE ENTHUSIAST

antonymittul@gmail.com | +91 79048 63564 | linkedin.com/in/antony04 | github.com/AntonyMittul | s-antony-mittul.vercel.app | India

SUMMARY

Passionate AI & Data Science enthusiast who builds end-to-end, data-driven products - from RAG systems and agentic workflows to deep-learning models. Skilled in Python, machine learning, and modern AI tooling, with a focus on turning complex, messy data into practical, high-impact solutions.

TECHNICAL SKILLS

Programming & Data: Python, Pandas, NumPy, EDA, Feature Engineering, Model Evaluation
Machine Learning & Deep Learning: Machine Learning, Deep Learning, PyTorch, TensorFlow, CNN, NLP, OpenCV
Generative AI: LangChain, LangGraph, RAG, Agentic AI, Prompt Engineering, FAISS (Vector Databases)
Data Visualization: Matplotlib, Seaborn, Streamlit, Power BI, Tableau
Web & Tools: React, TypeScript, FastAPI, Git, Figma

EXPERIENCE

AI Intern - Orion Innovation Dec 2025 - Apr 2026

- Designed and built **DataSense AI**, an end-to-end analytics platform converting structured (CSV/Excel) and unstructured data into actionable business insights using Retrieval-Augmented Generation (RAG).
- Engineered a modular FastAPI backend with an agent-based architecture; retrieved context via FAISS vector embeddings to generate accurate, grounded, low-hallucination responses.
- Implemented data preprocessing, profiling, and semantic-chunking pipelines that improved retrieval relevance and response latency.
- Built an interactive React + TypeScript dashboard supporting natural-language querying with dynamically generated insights and visualizations.

Software Developer Intern - XUVI Technology Labs Pvt Ltd Jan 2025 - Mar 2025

- Developed **InfoPoint**, a cross-platform car-detailing app using C# and .NET MAUI for Android and iOS.
- Implemented service booking, package browsing, and vehicle-wise history tracking with a clean, responsive UI.
- Gained hands-on experience in mobile app architecture, backend integration, and real-world product deployment.

PROJECTS

DataSense AI - Agentic Business Insight Agent

Python, LangChain, FAISS, FastAPI, React, TypeScript
End-to-end analytics platform enabling natural-language querying over structured and unstructured data using RAG; agent-based FastAPI backend with FAISS retrieval and a React + TypeScript dashboard.
[Live Demo](#) | [Source Code](#)

Navora - Multi-Agent Travel Assistant

LangGraph, FastAPI, React, TypeScript, Tailwind
Collaborative multi-agent travel planner where specialized agents coordinate over flights, hotels, weather, and budget to plan trips end-to-end from a single natural-language prompt.
[Live Demo](#) | [Source Code](#)

LungSense AI - Lung Disease Prediction (CNN)

PyTorch, OpenCV, Grad-CAM, Streamlit
Multi-class lung-disease classification from chest X-rays; CNN with Conv-ReLU-MaxPool blocks, trained with Adam, early stopping, and LR scheduling. Grad-CAM heatmaps add explainability. Deployed on Streamlit; achieved ~85% accuracy with 5-fold cross-validation.

EDUCATION

B.Tech, Computer Science & Engineering 2022 - 2026 | CGPA: 8.8
Hindustan Institute of Technology and Science

CERTIFICATIONS

- Anthropic Academy - Claude 101 Certification
- Data Science Training - Internshala
- Data Analytics & Visualization - Forage
- Excel Dashboarding - Udemy

LANGUAGES

English, Tamil
